Attorney's Docket No.: 07844-729001 / M144

31. (New) A method comprising:
receiving by a web authoring tool first information to be contained in a first file, the first information comprising computer source code;
receiving by the web authoring tool second information characterizing one or more properties of the first information;
storing in the first file the first information but not the second information; and
storing in a second file, distinct from the first file, the second information.

32. (New) The method of claim 31 wherein the second information is stored in the second file using at least one XML tag.

33. (New) The method of claim 31 wherein the computer source code comprises HTML code.

34. (New) The method of claim 31 further comprising:
receiving a request to open the first file; and
automatically displaying at least a portion of the second information responsive to the request.

35. (New) The method of claim 31 further comprising:
receiving a request to move the first file to a destination; and
automatically moving at least a portion of the second file to the destination responsive to the request.

36. (New) The method of claim 31 wherein the second file comprises a name corresponding to a name of the first file.

37. (New) The method of claim 36 wherein the second file name comprises the first file name.
